HARMONYPAD.IO

Pad, reimagined.

HarmonyPad Use Case

- Harmony (ONE) is a unique consensus platform that focuses on processing speed and validation to facilitate the creation and use of decentralized applications (DApps)And some text

- The Harmony MainNet has an average of 2,000 transactions per second (TPS) but can reach a maximum of 24,000 TPS much higher than ETH, BSC, DOT, Fantom, ThorChain, etc

- Harmony has launched a $1 Million Hackathon that will see the bridging of TradFi and DeFi to allow web3 and web2 developers to get together and build exciting apps, protocols, and tools.

HarmonyPad Use Case

- The successes of DEX's has greatly signified a major leap in the adoption of blockchain applications, bringing hundreds of millions of trading volume to the rapidly expanding Cryptocurrency market, Hundreds of new projects are launching every single day

- The power of determining the future of blockchains lies in the many hands of Smart Contract Developers and Project Creators. With the current high demands on Blockchain Projects and driven by wrong intentions, Scams and Rug-Pulls are now becoming more rampant. HarmonyPad is aiming to change that and help drive the next generation of Blockchain projects

VISION

To help launch credible and successful DAPPS on Harmony that brings impact and value to the world while bringing mass adoption to Harmony blockchain

HarmonyPad Features

Cross-Chain

ONEP token is launched on BSC network and will merge to ONE Mainnet while supporting multi-chain IDO's

Deflationary

All tansactions will have a 3% burn fee. The burning will continue until there are 100 million tokens left

Bot Protection

HarmonyPad utilizes 24/7 tech preventing sniping bots. This protection is upheld & enforced by Solid Group
